

# COLOR TOUCH-SCREEN DISPLAY

## PRINTER OPTION

A color Touch Screen display

### AN INTUITIVE GRAPHICAL INTERFACE

The new 2.4-inch color touch screen display lets you interact directly with the printer. This unique feature can be factory mounted or on-site upgrade.

The display, available in 16 languages, delivers information on the printer and consumables and allows to set some parameters (operating language, LCD settings, offsets, sleep mode, network settings).

#### Target applications:

- Banking
- Transit
- Loyalty
- Casinos

#### Supported printers:

- Primacy Expert
- Primacy Lamination
- Upon project request:  
Zenius  
Elypso

Compatible on printers produced from March 2013 (from SN: 10000295187)

This option is ideal for counter applications and operating environment without Evolis Premium Suite, requiring immediate printer information and reactivity to answer the printer's messages.

You can act quickly for the maintenance without having to be in front of the computer.

The diagnostics and the maintenance management are easy and intuitive.

### NOTIFICATIONS IN REAL TIME

All the printer's statuses are available permanently and displayed in real time and are easily understandable (color management):

- Notifications about the ribbon/cards level
- Ready to print (green color)
- Warning messages (orange color)
- Error messages (red color)

Localized management: you can relaunch or cancel a print job due to an error directly from the display for a convenient printer operation<sup>1</sup>.

Regular and advanced cleanings can be launched from the printer without the computer uses. A wizard on the display provides you the different steps.

By default, a buzzer warns you when:

- An error occurs
- During a print job, a warning message occurs.

Get a graphical touch screen interface for direct interaction with the printer for easier monitoring and operation.

<sup>1</sup> Evolis Premium Suite needs to be installed in Supervised or Standard Mode
