ID Card Centre are experts in PVC ID card and name badge printing and we are proud to introduce to you our range of XL / large format printers for hire or purchase.

Why use XL cards and badges?

Large format PVC cards are ideal for all kinds of event badges and passes for concerts, sporting events, festivals, conferences and exhibitions.

Due to their large size, they can be fully branded to the event whilst leaving plenty of room for information and personalisation for:

- Event Accreditation
- Organisers
- Contractors
- VIP passes
- Security personnel
- Catering staff
- Backstage passes
- First aiders
- Athletes and sports people
- Speakers
- Presenters
- Musicians

Can XL cards be personalised?

Yes, absolutely! Whether it be just names and photos, images denoting access areas, barcodes or contactless encoding to work with access control systems – oversize cards can be personalised in most of the same ways as standard credit card sized PVC cards.

Why use our card printing bureau service?

Our card printing bureau will assist you with all aspects of the badge production process from setting up the initial design and database for capturing your attendees details to printing and sorting the cards.

We can do as little or as much as you need us to so we become an extension of your team pre-event. The majority of our event clients want us to work in one of two ways:

1. We print the base design on the card leaving them to do the personalisation of the badges on site. This saves them a considerable amount of time and money as they are only printing a small amount of information and generally only in monochrome, saving on consumable costs.
2. We print everything including providing spare badges in case of any last minute changes or additions on site.

Can I hire an XL card printer?

Yes and ID Card Centre are one of very few companies offering this service. Printer hire is extremely low cost and can easily be assigned to the cost of the event (rather than printer purchase which generally requires a lengthy approval process!). By having your own printer on site you can handle the personalisation of the badges yourself or simply have it there in case of any last minute printing needs.

All of our printers come on a minimum 7 day hire giving you plenty of time to receive it prior to your event. Our technical support advisors will be on hand to talk you through the set up and get you started with your badge printing.
