Confidentiality Assured.

Cam-Block Stickers are the ultimate solution for privacy and exclusivity. Designed to cover cameras on mobile phones and other devices, these tamper-evident stickers ensure that no photos or videos are taken without permission.

Cam-Block stickers are lo-tack adhesive labels that cover small device cameras to add security and confidentiality to your event, without the need for preventing the use of devices like mobile phones.

They cannot be re-applied once removed as the sticker shows as 'VOID', and there's no sticky residue left on the device. Provide your clients or attendees with a forward-thinking solution to privacy whilst giving them the autonomy they deserve.

Add a touch of class to your event with personalised Cam-Block stickers.

Print your logo on each sticker for a full branding experience, and with a range of colours available as well as custom printed colours, you can bring the perfect vision to life – with secure, assured privacy.

With a minimum order quantity of 1,000 stickers, you can provide a full personalised event experience for all of your attendees and ensure privacy with style.

No leftover residue

The smart adhesive on Cam-Block stickers means that they don't leave any sticky residue after they've been removed.

Various colours

With a range of colours available, Cam-Block stickers can match your organisation's branding – or you can opt for simple black or white.

Printing options

Opt for plain stickers, stickers printed with the Cam-Block logo and sequential numbering, or add your logo for a personalised touch.

Prevent information leaks with ease

Privacy Maintained.

With the rise of mobile technology, the risk of intellectual property leaks is growing. Accidental or intentional leaks can have a costly impact on the film industry. Cam-Block stickers are designed to avoid any leaks.

Reduce the risk of unauthorised information being shared about your project by handing out Cam-Block stickers, for mobile device cameras and laptop web cams.

Designed with tamper evident technology, the smart adhesive on each sticker reacts to show a 'VOID' messaging when it is removed.

We understand that device cameras aren't one size fits all, which is why we offer two different sizes of sticker.

There are also a range of colours available, ideal for matching your branding or ensuring that stickers cannot be replicated for future projects.

Identify stickers by choosing ones with a printed Cam-Block logo and sequential numbering, or offer an attractive, personal touch by printing your logo.

With a minimum order quantity of 1,000, personalised Cam-Block stickers promote your brand and match your aesthetic.

Lo-tack labels

The smart adhesive on Cam-Block stickers leaves no residue on your device, while showing 'VOID' messaging to prevent re-application.

Tailor to your brand

Choose from different sizes and colours to ensure that all devices can be covered, and you can match your branding.

Plain or printed

Switch up your safeguarding with options. Stickers can be plain, printed with the Cam-Block logo, or personalised with your brand.

Confidentiality Secured.

Protecting your intellectual property is crucial at launch events, but smartphones make confidentiality difficult. Add privacy to your events and prevent leaked information with Cam-Block stickers, the ideal solution designed for blocking cameras on a range of devices.

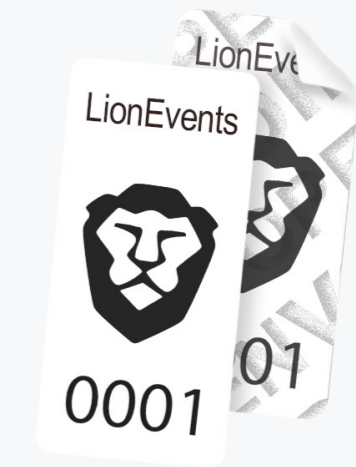

With devices like smartphones ingrained in daily life, it can be difficult to prevent people from using them entirely. Cam-Block stickers are designed to cover device cameras and stop photos and videos being taken.

As a tamper-evident product, Cam-Block stickers cannot be removed and reapplied. If they have been removed from the camera, 'VOID' messaging shows, making it obvious which attendees have been tampering with their stickers.

Alongside the tamper-evident messaging, the adhesive on Cam-Block stickers is lo-tack and does not leave any residue on the device.

To add a custom touch to your event, choose personalised Cam-Block stickers and print your logo onto a coloured sticker that matches your brand.

With a minimum order quantity of 1,000 stickers, offer your attendees privacy and personalisation at every point of your event.

No sticky residue

Once the sticker has been removed from the device, there's no leftover residue that needs to be wiped off.

Colour matching

Choose from simple black and white to match any branding, or pick from a range of vibrant colours for a closer match.

Customisation

Add variety to your events and prevent sticker re-use by choosing stickers that are plain, printed with the Cam-Block logo, or even personalised.

A simple solution for reducing IP theft

Your one-stop-shop for tailored identity and access control solutions.

Supplying custom card printing, ID card printers, consumables, and accessories.
